

One Platform does it all

Organize and retrieve your digital assets in our highly secure digital asset management system.

Collaborate to create new content using our powerful set of Web based Communication tools.

Publish your rich media anywhere on the Web, streaming or downloadable and track it's usage.

Sell or share your content in your own Web storefront that takes credit cards and on-line payments.

Why we built Onstream DMSP

Here at Onstream Media we realize that along with the creation of vast amounts of digital media, public and private entities alike face the Herculean task of ingesting, indexing, managing, and storing this content. Preserving legacy content, often on a myriad of formats, would prove equally challenging. Unfortunately, providing these services in house is an enormous investment in hardware, software and personnel. Most small to midsize entities cannot afford such a system, but they can afford a monthly fee for an online service to handle all of these tasks for them. The DMSP is a highly secure digital media platform, offered as an on-line service, that provides all of the needed tools without the burden of the investment of time, staff, and dollars to build it and run it themselves.

FEATURES

Content Management

Organize and retrieve your Digital Media assests

Managing digital media assets (video, audio, PowerPoints, Flash etc.) represents an enormous challenge. Onstream gives you a diverse set of ingestion and search tools to index your content for quick retrieval when it matters most. Best of all, you have the piece-of-mind that your media, marketing materials, advertising, video, audio and stock footage libraries are secure and organized for years to come.

DASHBOARD - improving workflows

DMSP streamlines your workflows by letting you customize your features on a web browser dashboard. Onstream services are organized in widgets, (small, self contained interfaces that perform specific tasks) that can also reside directly on your desktop so you do not have to launch a browser to get direct access to content or other features.

Storage - Multi-Petabyte System, Highly Secure

Onstream houses one of the countries largest, highly secure, storage servers, aptly named "Big Kahuna". Several levels of near on-line and off-line storage are also offered as part of the service. Onstream DMSP can also point to your own storage facilities if for added security purposes you require keeping content on your premises.

Streaming and Distribution - Hosting

Onstream provides hosting for it's customers through several large Content Delivery Networks (CDN), as well as it's own. Your media can be routed to the right CDN depending on your content format and delivery demands. Our tracking system will keep you up to date and give you complete accountability through viewer's usage statistics and reporting.

Many digital paths

Our clients have very diverse needs for the distribution of their content. Onstream offers many distribution paths and is constantly adding new ones. Here are a few:

- route via E-mail
- route via Satellite
- publish to Web via CDN (streaming)
- publish to Web via Download
- publish to Cell Phones
- route to DVD/CD Duplication service and drop ship
- publish to MediaExchange storefront as Pay-per-View
- route to professional printer

Transcode your content into any format

Our state of the art transcoding system automatically converts your content at the push of a button. Formats include MPEG-1, MPEG-2, MPEG-4, OMF, AVI, MXF, Flash, Quicktime, Real, etc. You can also upconvert Standard definition to HD 1080i.

Collaboration & Presentations

Collaborate on a **Webconference**

Onstream Conference gives you the ability to collaborate with small to medium size groups using desktop application and remote sharing. Onstream conference assists in both the creative and approval process and is a great way to make powerful presentations without leaving your office.

Live **Webcast to Large Audiences**

Onstream Visual Webcaster is a browser-based webcasting application that enables users to create and conduct live and on-demand webcasts to millions of viewers. 78% of the Fortune 100 CEO's have used our Visual Webcaster platform.

Create self-narrated on demand presentations

QuickCast™

Onstream Quickcast is a self-narrated web presentation creator using Microsoft PowerPoint slides and a telephone. Quickcast is an easy and effective way to create sales presentations and E-learning/training courses.

Podcasts

Quickcast has a Podcast option allowing you to call a toll free number and create your Podcast message. You can then direct that message to any number of previously setup RSS feeds that will direct your audience to your Podcast.

Translation and Narration

Looking for a professional voice talent to narrate your next presentation? Quickcast can take your self-narrated file and return it to you professionally narrated in English, or translated into any foreign language you need. Prices will vary depending on language.

Stock Photo Libraries

Get unlimited use of 80,000 + royalty free photographs. This is a great source in helping you improve your presentations, advertisements, websites, and documents. Photographers can also offer their photos for sale on one of the web's largest stock photo libraries.

Make money promoting and selling your content

Sell content on **MediaExchange**

Onstream MediaExchange™ provides an on-line web storefront option. Here, content can be offered on a pay-per view basis and collects payments through several credit card services and on line payment programs. Your storefront is managed by you, so there is no need for a web programmer every time you need to make a change.
